

Major Goals:

- To advocate for fairness in homeowner and dwelling insurance which export substantial amounts of money from the NC 20 counties.
- To advocate for science based environmental rulemaking in all areas of environmental regulation.
- To advocate for reasonable enforcement of environmental rule infractions rather than draconian penalties with little or no administrative challenge opportunities.
- To advocate for economic impact assessments in all rulemaking to ensure equitable and reasonable balance between private property rights, environmental protection, and economic development.
- To advocate for the current equity formula in transportation spending in North Carolina, and support of coastal transportation programs such as ferries and bridges.
- To advocate for beach issues as requested and to support other coastal organizations
